

MY CUBE®

OPERATING MANUAL

WELCOME

Thank you for purchasing a
MyCube safe.

MyCube keeps your valuables secure and organized so you are free from worry. We know owning one will give you greater peace of mind.

As two women running MyCube, we took extra care to consider design, quality, and convenience - the same qualities that inform our daily lives.

With a customer service team that is available around the clock, we are here for you.

Thanks for choosing MyCube.

Lois and Joyce

IN THE BOX

MyKit Contents

1 Allen Wrench

8 Screws

8 Washers

4 AA Batteries

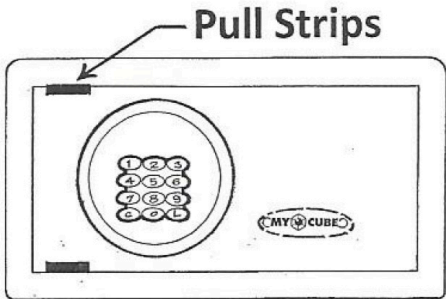

2 Manual Keys

FOLLOW THESE STEPS

Step 1

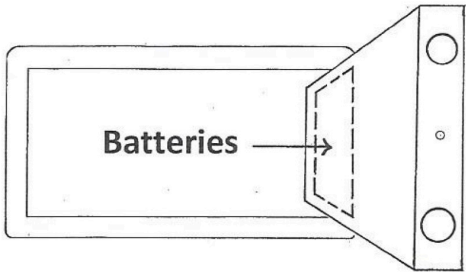

To open door, pull felt strips.

FOLLOW THESE STEPS

Step 2

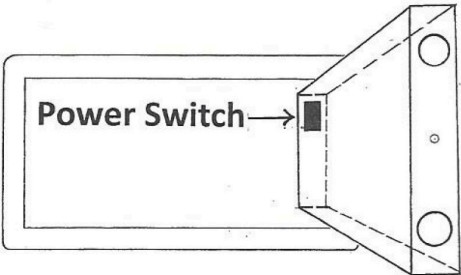

To power safe, take battery cap off with allen wrench and insert 4 AA batteries.

FOLLOW THESE STEPS

Step 3

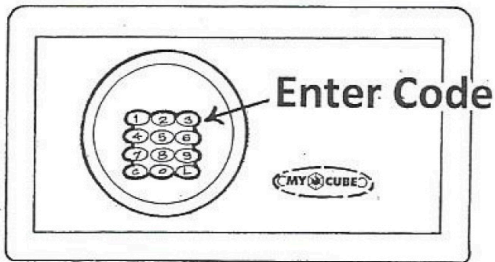

To turn keypad on, flip power switch at inside door hinge.

FOLLOW THESE STEPS

Step 4

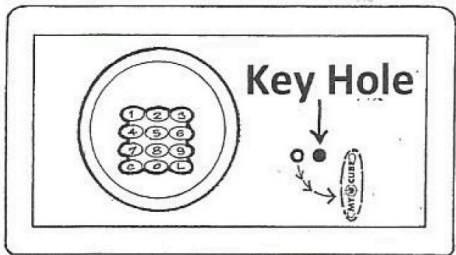

To set your user code, enter your 4 digit code and press Lock. To open the safe, enter your 4 digit code. To lock the safe, simply press Lock.

FOLLOW THESE STEPS

Step 5

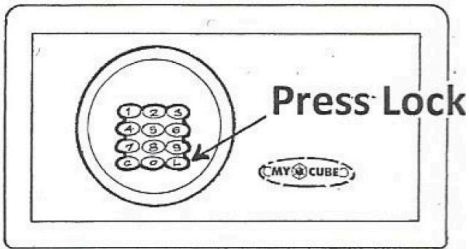

When batteries run out, unscrew silver plate on front of safe with the allen wrench. Insert key in exposed hole. Turn key to open door. Insert new batteries as in Step 2.

FOLLOW THESE STEPS

Step 6

To change your user code, flip inside switch off and on. Enter your new code, press LOCK button.

IMPORTANT NOTE

Keep your keys out of the safe
and register your key number on
mycubesafe.com

This is the only way to replace your keys should you misplace them. **MyCube strongly recommends changing your batteries every year.**

INSTALLATION

There are eight (8) points of contact to secure your MyCube. Four (4) points on the bottom, and four (4) points on the back of each safe. When the safe is in the desired position, take a marker and through the pre-drilled holes inside the safe, mark the surface(s) on which you will be securing the screws. Remove the safe and use a power drill and drill into each mark to make holes for the provided screws. Put the safe back in position, and line up each hole in the safe over each of the drilled points. Place each of the provided washers over each hole inside the safe, and with a screwdriver or right-angle power drill, secure each screw into the surface.
